M O N D A Y	It's hard when we can't hug our friends. Watch this video about 2 friends and how they discover ways to show that they care about each other.	Have you ever wondered why butterflies are so colourful? Watch this video from Mystery Doug to find out.	Place some letters on a tray, cover them with a cloth, and take one away. When the letters are uncovered guess which letter is missing.	Colour some patterns on the caterpillars . What pattern can you make? (AB, AAB, ABB, ABC)
T U E S D A Y	Handwashing is really important to help us stay healthy. Here's a video and song to help remind you how to wash your hands properly.	 <p>Find loose parts from around your house to create a butterfly. Think about shapes, symmetry, and the parts of a butterfly (wings, 3 body parts, antennae)</p>	Journal entry - Listen to The Very Hungry Caterpillar . He ate so many delicious things on Saturday! What is your favourite food? Draw and write about it.	Play The Very Hungry Caterpillar roll and colour game . Roll a die and colour the food item with the matching numeral.
T H U R S D A Y	Do The Very Hungry Caterpillar with Cosmic Kids Yoga.	Go on a Backyard Scavenger Hunt .	Retell the story of The Very Hungry Caterpillar to someone in your family. What happened first? What happens at the end?	Go outside and do some math with rocks. Click here for some ideas.
F R I D A Y	<u>Communication self-assessment</u> : Are you good at sharing your ideas? Draw a picture of you communicating with your family or friends and share that picture with your teacher.	Do this science experiment to watch a butterfly "grow". You will need a balloon, baking soda and vinegar.	Print your first name. Now find something in your house that begins with each of the letters in your name.	How many ways can you show the number 9? Draw them in your math book and take a picture to send to your teacher. Then have fun making your 9 dude.
